BACKHOUSE HYBRIDS

The late Mrs. Backhouse of England was successful in raising many beautiful seedling Lilies from crosses made between **L. Martagon** and **L. Hansonii**. It was a great pleasure, last Summer, to see these Lilies luxuriating at Sutton Court, the home of the raiser, together with many other beautiful hybrids as yet in their infancy.

BROCADE. A most effective garden Lily, vigorous and very free-flowering. Each inflorescence carries a multitude of orange-yellow flowers, overlaid with rosy-pink on the outside, and the interior marbled pink with chocolate spots on a yellow ground. Height 6 ft. June-July.
\$5.00 each.

GOLDEN ORB. Flowers are three inches across, of a light clear straw color with green center, conspicuously spotted with small crimson dots; outside ribbed deep golden-brown. Height 3 to 4 ft. June-July.
\$10.00 each.

MRS. R. O. BACKHOUSE. A tall and stately Lily bearing fifteen to thirty flowers of an orange-yellow tone, lightly spotted purple. Very distinct in character. Height 5 ft. June-July.
\$3.00 each.

SCEPTRE. One of the most vigorous and free-flowering of the new varieties. The flowers, which are star-shaped, are pinky-buff, and are freely covered with small dark spots. Height 6 ft. June-July.
\$5.00 each.

SUTTON COURT. Somewhat similar to the foregoing variety, but stronger in growth and growing even taller. The flowers are more reflexed and heavily spotted with purple, whilst the exterior of petal is distinctly shaded with pink, the exterior surface being of a light yellow. Height 6 to 7 ft. June-July. (Illustrated on page 4.)
\$4.00 each.

A FEW OLDER VARIETIES OF LILIES

FARRERI (Duchartrei). This variety was discovered in Yunnan, China, by the late Mr. Reginald Farrer, and has been referred to as the "Marble Martagon Lily." It is a slender and graceful Lily, bearing numerous, recurved, white flowers, slightly spotted purple on exterior. Height 3 to 4 ft. June-July. (Illustrated on page 1.)
\$2.50 each; \$25.00 per dozen.

A FEW OLDER VARIETIES

(Continued)

LOWII (Bakerianum). A very rare Burmese Lily which had been lost to cultivation for many years. It has pendulous, bell-shaped white flowers, with ribs of delicate green, the throat being thickly spotted with red. Height 3 ft. June-July.
\$3.00 each; \$30.00 per dozen.

JAPONICUM COLCHESTERENSE. This grand Lily bears large, fragrant, trumpet-shaped flowers of a pale yellow, fading to a creamy-white, streaked irregularly outside with reddish-brown. Height 2 ft. July.
\$1.75 each; \$18.00 per dozen.

MARHAN. A lovely hybrid between **L. Martagon Album** and **L. Hansonii**. The color is unique, being a clear orange with red-brown spots and streaks. A vigorous grower. Height 4 to 5 ft. June-July.
\$1.75 each; \$18.00 per dozen.

MARTAGON DALMATICUM. One of the most handsome and notable Lilies in cultivation, even stronger growing than the type, bearing fine spikes with numerous dark, recurving, bell-shaped flowers, varying in color from wine-red to deep, glossy purple. Height 5 to 6 ft. June-July.
\$2.00 each; \$20.00 per dozen.

MARTAGON DALMATICUM CATANAE. A still deeper variety of Dalmaticum, with beautiful flowers almost purple-black or crimson-black. A unique Lily. Height 4 to 5 ft.
\$2.00 each; \$20.00 per dozen.

MAXIMOWICZII (Red Leichtlinii). A pretty Lily on the habit of **Leichtlinii**, bearing six to eight flowers of an orange-red color with dark spots. Height 4 ft. Sept.
\$0.75 each; \$7.50 per dozen; \$60.00 per 100.

NEPALENSE. A rare Burmese Lily with large, funnel-shaped, golden-yellow flowers, tinged with deep purple in the inside, and often marked with scattered dots. Requires good protection in winter. Height 3 ft. Aug.
\$1.50 each; \$15.00 per dozen.

SULPHUREUM. A splendid Lily with large, tubular white flowers with rich yellow throat. Height 5 to 6 ft. Aug.
\$1.00 each; \$10.00 per dozen.
